

Your safety in surgery requires that you disclose all medications, vitamins and supplements that you regularly take. In the TWO WEEKS PRIOR to surgery, you will be required to stop taking certain medications, vitamins and supplements, both those you regularly take, and those that may be taken incidentally for pain or other symptoms.

Please notify Dr. Brad Strawn, or other Scultura team member, of any and all medications you take during the TWO WEEKS prior to surgery. If you have taken a medication that may put you at risk, it may require that your surgery be rescheduled, or postponed. This is for your safety.

**Before you stop taking any prescription drugs, you must receive clearance from the prescribing physician.** Please notify our office immediately if you do not receive clearance to stop taking your prescribed medications.

**The following drugs could cause life-threatening problems with surgery. If you are on these you must discuss this with the doctor. Patients who take these drugs may require laboratory tests and a consultation with their physician to determine when they may safely undergo a surgical procedure.**

Coumadin	Elmiron-IC
Methotrexate	Plavix
Fragmin and other Low Molecular Weight Heparin Drugs	Persantine

**Aspirin and aspirin-containing medications and anti-inflammatory agents must not be taken in the TWO WEEKS prior to surgery.** Always read the active ingredients on any over the counter or prescription drug packaging. Attached is a listing of common drugs containing aspirin for your reference.

**All Herbal or Dietary Supplements should be stopped TWO WEEKS prior to surgery.** This includes vitamins, fish oil, anti-oxidants supplements, as well as consumption of any form of Green Tea.

**There are several categories of additional medications that must not be taken in the TWO WEEKS prior to surgery.** A listing of these drugs is attached.

#### Authorization

- I have disclosed all of the medications, supplements and herbal remedies I take on a regular or incidental basis to Brad Strawn, M.D., and/or another Scultura team member.
- I understand that I am required to refrain from taking any of the above and below listed medications in the TWO WEEKS prior to surgery. Should I take any of the medications, supplements or herbal remedies I am instructed to avoid, it is my obligation to notify Dr. Strawn. I fully understand that my surgery may have to be rescheduled or postponed in the event that I have not complied with these medication restrictions listed.
- I also understand that it is my responsibility to obtain clearance from the prescribing physician before I stop taking any of my regularly prescribed medications.
